Journey Toward Sustainability:

AAPS' Electric School Bus Initiative

Ann Arbor Public Schools is taking steps to become environmentally sustainable by reducing pollution and waste. The goal for reducing pollution is very ambitious: no direct carbon emissions by 2035. The majority of these direct emissions at AAPS come from the burning of natural gas for space and water heating, as well as diesel and unleaded gasoline for buses and fleet vehicles. To read more about AAPS' electric school bus initiative, please [follow this link](#).

AAPS Capital Program's objective is to transform the student learning experience with the goal of providing for the health, safety, and well-being of all students in high-quality, equitable, and environmentally sustainable schools.
