Mass Timber: A Sustainable Building Method for 21st Century Schools

As Ann Arbor Public Schools works to transform its facilities into 21st-century learning environments, the district is utilizing construction methods that support both educational goals and environmental commitments. Mass timber construction has emerged as a promising approach that addresses multiple district priorities. To read more, please [follow this link](#).

AAPS Capital Program's objective is to transform the student learning experience with the goal of providing for the health, safety, and well-being of all students in high-quality, equitable, and environmentally sustainable schools.
