Environmental Sustainability

Investments at Freeman

A 40-acre site in Dixboro is becoming a district-wide hub for hands-on environmental learning, supported by Capital Program renovations, a new greenhouse, and a planned solar canopy for outdoor learning.

The Freeman Environmental Education Center is the home to one of the oldest K–12 environmental education programs in the United States, and it is receiving a series of capital investments reshaping its indoor and outdoor learning spaces.

Phase 2 Major Projects

New Construction & Environmental Sustainability

Ann Arbor Public Schools is integrating mass timber construction into new school buildings. This method contributes to creating environmentally sustainable, high-performing school buildings for quality learning environments.

Environmental Sustainability

Sustainability & Student Health

As part of the Capital Program, Ann Arbor Public Schools is replacing aging flooring across multiple school buildings with sustainable materials designed to improve indoor air quality, reduce chemical use, and create healthier spaces for students.

Floors are one of the largest surface areas in any school building, and their condition directly affects

indoor air quality, maintenance demands, and the daily experience of students and staff.
